Subject: Lead Issue in Clarksburg, WV

Good Morning Everyone,

Annie reached out to the WV Department of Health and Human Resources and they are aware of the situation and we are waiting to hear from the staff person in charge (Paul Ice) to get back to us on the details. We are looking for the following information.

- Do you have any information on the addresses where these EBLLs occurred?
- Do you know if these were owner occupied or rental units?
- Do you have any testing results related to the EBLLs? Were risk assessments performed?
- Do you have any additional information related to this issue that you could share with EPA?
- If the homes were built before 1978 and are rental units, the Lead Disclosure Rule may apply, or if renovations were performed in these residences, the Renovation Repair and Painting Rule may apply.

AQ
